## THE GENESIS

### The Management's Articulation

India is the cradle of civilization and education has always been a backbone for its rich heritage. Education system is of no worth if it teaches young minds how to make a living but does not teach them how to make life. Since times immemorial Indian education has focused on all round growth and development of the

individuals and we are carrying on this legacy at Delhi Public School, Udaipur to make every Dipite an asset to the society, the nation and to the entire humanity by inculcating in them sense of duties and responsibilities and respect for values and morals. It gives me a sense of accomplishment to announce that the school provides appropriate environment and expert faculty to the students to hone their scholastic and co-scholastic talent in the fiercely competitive world.

The school is accomplishing its noble aim under the expert leadership of Mr. Sanjay Narvaria, the Principal Incharge who is an experienced educationist with a demonstrated history of working in the education management industry for past 18 years.

At this point when the school has stepped in the 11th year of its incredulous journey, I wish that under the guidance of able stewards and the earnest efforts of the crew, the school reaches the zenith of education.

With good wishes to the team of DPS, Udaipur...

### Words of Wisdom

Dear Parents

Positive change in this world begins with the children-with nurturing them, providing them with love, and teaching them about love, respect, and authenticity. As fellow humans on this journey through life, I must recognize them as our students, showing them patience and empathy, offering them mercy and forgiveness, and treating them with respect and dignity-celebrating the unique soul they harbor within. And if I

desire to contribute to this change, I must start by instilling positive traits into our future generations. Our children need us for encouragement, for love, to act as strong role models who are willing to share our lives and our thoughts with them.

Education is an irreplaceable gift that makes us happy, peaceful, fearless and doubtless, but most importantly it makes us better human beings. Education itself removes the darkness away from our lives and suddenly we see how beautiful the world is. Education doesn't consist of schooling and pointless years of work we will never need, but of the experience in our lives because experience is often our best teacher. Gaining knowledge and getting good grades do not make one educated. An educated person knows how to live, hope and behave with others around and this makes education indispensable in one's life.

The education system of Delhi Public School with the motto 'Service before Self' offers a variety of ways in which your ward can recognize and hone his/her talents. The management of the school is always ready to support your productive endeavors.

With warm regards

versatile branch of science and is a real fun to explore. It develops excellent analytical skills, mathematical and problem solving skills, creativity, data handling, communication skills and observations skills.

So if you have passion for Chemistry, then doors are open for you to pursue a wide range of careers and contribute positively to the world.

### The Era of Biologist

Science is an endless search of truth with no finality; sometimes no single best representation. There is only deeper understanding and more revealing. Biology major is a good choice for students who enjoy science and are intrigued by the living world since biology is currently brimming with maximum career opportunities. The coming era will come to be seen as a necessary and unavoidable transition stage in the overall course of biology. Increasing opportunities will emerge for biologists along with new jobs in various fields like clinical researches,

biotechnology, microbiology, medical transcription, agricultural scientist, ecologist, environmental consultant, field trials officer, marine scientist, nature conservation officer, physician associate, zoologist, conservationist, horticulturist, taxonomist, etc. The coming era will be ruled by biologists with services in almost every field. Biology students will also find positions in some of the highest paid non-medical jobs like they can excel in many areas of the law that draw on scientific knowledge and reasoning such as Attorneys, Patent and Intellectual property lawyers, being medical and health services managers, financial analysts working as analysts in biotechnology as genetic counsellors, health educators, biochemists, pharmaceutical product sales representatives; biological technicians and a lot more.

### Physics : New Avenues

Physics is the natural science that involves the study of nature. The main goal of physics is to understand how the universe behaves. New ideas in Physics try to explain complexities of nature and help to explain fundamental mechanisms of other sciences. It opens new avenues of research in areas such as Mathematics and Philosophy.

One of the most popular courses/disciplines that science students consider pursuing after their Class 12 is joining a B.E/B.Tech course. This is a good career choice because all the concepts, theories and practical exposure science students receive in their Class XI and Class XII curriculum prove extremely helpful when pursuing an engineering degree in

college. Students who have studied Physics in Class XII can pursue engineering in Aerospace, Agricultural, Automobile, Biochemical, Biotechnology, Bio Informatics, Ceramic, Chemical, Civil, Electrical, Electronics, etc.,. Students who are interested in a bright, prospective career in Physics should opt for graduation or integrated dual degree programme in Physics. Thus, Physics has promising career prospects. Exploring the mysteries of the universe, the science behind the movement of objects in this universe, etc. creates interest and curiosity in young minds driving them to move ahead in this subject as well as helping the society as a whole.

## STUDENTS' CORNER

'With faith, discipline and selfless devotion to duty, there is nothing worthwhile that you cannot achieve.' This has been truly said by Mohammed Ali Jinnah and I realized the significance when I rendered my services as the Vice Head Girl of the School in the session 2016-17. I feel extremely honored as I learnt the values of hard work, discipline, responsibility, leadership but most importantly, the importance of team work. I am grateful to the teachers and the Principal /C for always guiding me and helping me to juggle between my duties & my academics. This was a very enriching experience that I will cherish forever in my life. Life is not only about academic achievements, it is also about how you grow up as a good person who can contribute positively for the overall development of the society and the nation. I feel indebted to all my teachers of the school who have helped me grow holistically. Thankyou DPS, Udaipur.

**Mahika Jhota**  
Vice Head Girl  
(Session 2016-17)

Having joined DPS, Udaipur in the previous session itself, the school has never failed in surprising me. Not only did I get the privilege of being in the editorial board, but also the opportunity of exploring my inherent literary talent and helping others discover theirs too. Our school ambience is full of encouragement which has always made me and all my fellow Dipstites get out of our comfort zones and work upon building up ourselves in ways we had never imagined. I've always looked up to my teachers for help and guidance and they've always been a great support. My only wish right now is to make my teachers and my school proud and give them twice the pride they've given me.

**Uttara Ranawat**  
Literary Secretary  
(Session 2016-17)

This Institution has exerted the greatest influence on me after my family. The years that I spent in this school are not merely time spent in learning and filling my mind with knowledge, but also time spent in moulding my character and acquiring various attitudes and skills. The basic traits of our personality are formed during our school days. This school has helped me to groom my personality and enhance my confidence.

I am proud to be a dpsite and hope this Institution gets the acclaim of being the best in the state.

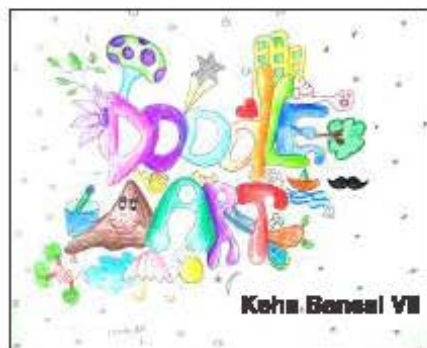

**Pranjal Jain**  
Student Coordinator  
(Session 2016-17)

Delhi Public School is a benchmark in modern day schooling. Being in the school almost since its inception, I believe that the school has grown endlessly. The pantheon of opportunities that the students may avail is immense. A school should be a place where children learn enough worthwhile things to make a strong start in life; where the seeds sown grow into saplings; where we get an innate desire to learn more, and I can proudly say that DPS does not disappoint. DPS creates a sense of community that allows one to express oneself within a framework of social responsibility. The atmosphere provides us with the support that a student needs throughout his/her school life and pushes the student towards success. We can very well compare the school to a growing tree: it adapts to the surrounding climate, it makes amends to its own wounds, and in season, bears fresh leaves, flowers, and fruits.
